PROFESSIONAL SUMMARY

Artificial Intelligence undergraduate and Professional Data Analytics Trainee at the Digital Egypt Pioneers Initiative (DEPI) with hands-on experience cleaning, organizing, analyzing, and visualizing data using Excel, SQL, Python, Power Query, Power Pivot, and DAX. Built interactive dashboards and reports for retail and marketing datasets, including KPI analysis and trend analysis. Detail-oriented, comfortable communicating analytical findings, and eager to grow in a junior data analyst role while gaining experience with real business data.

TECHNICAL SKILLS

Data Analysis: Data cleaning, data preprocessing, exploratory data analysis (EDA), KPI analysis, trend analysis, reporting, data visualization
Tools: Microsoft Excel, Power Query, Power Pivot, DAX, Power BI (foundational), SQL Server, Google Colab, GitHub
Programming & Libraries: SQL, Python, Pandas, NumPy, Matplotlib

EXPERIENCE & TRAINING

Professional Data Analytics Trainee — Digital Egypt Pioneers Initiative (DEPI) | Jul 2026 – Present

- Completing hands-on data analysis projects using Excel, SQL, Python, Power Query, Power Pivot, DAX, and data visualization techniques.
- Clean and transform raw data, calculate KPIs, analyze trends, and build clear reports and interactive dashboards for business-focused datasets.

GCI World 2026 Participant — Matsuo-Iwasawa Laboratory, The University of Tokyo | Sep 2026 – Present

- Selected for an international data science and AI program focused on strengthening practical analytical and technical skills.

SELECTED PROJECTS

Marketing Campaign Dashboard — Excel, Power Query, Power Pivot, DAX, Dashboard

- Cleaned and modeled marketing campaign data and built a three-page interactive dashboard covering overview, campaign performance, and region/device analysis.
- Created measures for revenue, spend, conversions, CTR, ROI, ROAS, cost per click, and cost per conversion; added slicers for interactive filtering.

Retail Sales Analysis & Dashboard — Excel, Power Query, Power Pivot, DAX, Dashboard

- Cleaned inconsistent retail data, handled missing values and mixed formats, built table relationships, and created DAX measures for analysis.
- Developed an interactive dashboard to analyze monthly sales trends, category performance, regional quantity, and top-performing products.

Used Car Market Price Intelligence Dashboard — Power BI, Power Query, DAX

- Cleaned and transformed a used-car dataset in Power Query, corrected data types, handled duplicates and missing values, and prepared the data model for analysis.
- Built an interactive Power BI dashboard with KPI cards, brand/fuel/transmission slicers, price and mileage analysis, Decomposition Tree, Key Influencers, and time-based trend analysis.
- Created DAX measures for total listings, average car price, total market value, and average mileage to support executive-level market analysis.

Population & Accommodation Analysis — Python, Pandas, NumPy, Matplotlib

- Cleaned and explored population and housing data, calculated summary metrics, and created visualizations to identify patterns across countries and cities.

EDUCATION

Bachelor's Degree in Artificial Intelligence — Damietta University | Expected 2029

SELECTED ACHIEVEMENTS

1st Place — Abu Dhabi University Engineering 3rd Annual Hackathon (2023/2024) | 4th Place — Abu Dhabi University Engineering 2nd Annual Hackathon (2022/2023)
3rd Place — Arab IoT Competition, Dubai University | Presenter — GITEX Global Technology Exhibition
Swift Accelerator Program (iOS), Sandooq Al Watan — Certified | IT Marathon 2023 — UAEU

Languages: Arabic (Native) | English (Fluent)
