

RANA AHMED ABDALLA

DATA ANALYST | ARTIFICIAL INTELLIGENCE STUDENT

New Damietta, Egypt | +20 109 837 2310 | rana6146955@gmail.com | linkedin.com/in/rana-abdalla

PROFESSIONAL SUMMARY

Data Analyst with a background in Artificial Intelligence and hands-on project experience in data analysis, data cleaning, data transformation, data visualization, professional reporting, and fundamental statistics. Skilled in Python, SQL, SQL Server, Microsoft Excel, Pandas, NumPy, Matplotlib, and Seaborn, with a basic understanding of data modeling concepts and dataset structures. Currently enrolled in the Professional Data Analysis Track at the Digital Egypt Pioneers Initiative (DEPI). Able to translate business questions into clear analytical outputs through cleaning, KPI analysis, comparisons, charts, and reports. Detail-oriented, eager to learn, and seeking a Data Analyst opportunity to develop through real business projects.

CORE TECHNICAL SKILLS

Data & Analysis

Python | Pandas | NumPy | Microsoft Excel | Data Analysis | Data Cleaning | Data Transformation | Data Preprocessing | Exploratory Data Analysis

Visualization & Reporting

Matplotlib | Seaborn | Data Visualization | Professional Reporting | KPI Analysis | Business Questions to Analytical Outputs

SQL & Data Structures

SQL | SQL Server | Relational Databases | Basic Data Modeling | Dataset Structures | Joins | Aggregates | Subqueries | Window Functions

Analytical Methods

Fundamental Statistics | Feature Engineering | Outlier Detection | Comparisons | Pattern Identification | Data Handling

PROJECT-BASED EXPERIENCE

Data Analyst - Project-Based Experience | Independent / Academic Projects | July 2026 - Present

- Marketing Campaign Performance Analysis: cleaned and standardized campaign data, handled missing values and inconsistent categories, checked invalid values and statistical outliers, calculated CTR, conversion rate, and ROI, and compared performance across campaigns, channels, regions, and devices.
- Population & Accommodation Data Analysis: built an end-to-end Python workflow using Pandas, NumPy, scikit-learn, Matplotlib, and Seaborn; performed data cleaning and transformation, feature engineering, aggregation, pivot tables, scaling, Z-score outlier detection, correlation analysis, and data visualization.
- SQL Practice & Querying: completed structured SQL exercises covering database/table syntax, constraints, data manipulation, joins, aggregates, ranking and window functions, PARTITION BY, subqueries, views, and indexes.
- Translated project questions into clear analytical outputs by preparing data, comparing performance measures, identifying patterns, and presenting findings through charts and concise reporting.

EDUCATION

Bachelor of Artificial Intelligence

Faculty of Computer Science and Artificial Intelligence, Damietta University | Current undergraduate | Focus: Artificial Intelligence and Computer Science

TRAINING & PROFESSIONAL DEVELOPMENT

- Professional Data Analysis Track - Digital Egypt Pioneers Initiative (DEPI), currently enrolled.
- IBM Data Fundamentals - in progress through DEPI.
- Google BI and Analytics with Looker - in progress through DEPI.
- Oracle "AI for You" Training and Assessment - completed.
- Swift Accelerator Program (iOS), Sandoq AI Watan - certified.

SELECTED ACHIEVEMENTS

- 1st Place - Abu Dhabi University Engineering 3rd Annual Hackathon (2023/2024).
- 3rd Place - Arab IoT Competition, Dubai University.
- Presenter - GITEX Global technology exhibition.
- 4th Place - Abu Dhabi University Engineering 2nd Annual Hackathon (2022/2023).
- iOS Design Challenge participant - Sandoq AI Watan.
- IT Marathon UAE participant.

STRENGTHS & LANGUAGES

Strengths: Attention to detail | Analytical thinking | Problem solving | Eagerness to learn | Rapid skill development | Team collaboration

Languages: Arabic - Native | English - Fluent
